

## Swimming pool safety advice for Casa Le Magnolie

- Do not leave unsupervised children accessing the swimming pool alone.
- Do not jump from higher ground into the swimming pool.
- Children under the age of 7 should wear inflatable gear when bathing in the swimming pool.
- Swimming/diving during the digestive period (0-2 hours after a meal) can lead to cramps and serious inability to stay afloat.
- When all the adults are leaving the swimming pool, it is strongly advised to take all floating toys out of the water so that children may not be tempted to dive to play with or retrieve them.
- **In case of emergency** you should call the number 112 and ask for help saying "ho bisogno di aiuto per un incidente in piscina. Venite in via di villa le terrazze sopra Piano di Mommio alla villa Fanciulli, vi aspettiamo al cancello in fondo alla collina". In that case it is strongly advised to go and meet the emergency service down the hill at the main gate.

**ALTERNATIVELY** call your contact person on her mobile phone and ask her to call for you the emergency number. You should still go and wait for the ambulance at the main gate down the hill.
